Playing the game

Ultimate Tic-Tac-Toe is set up like a regular game of Tic-Tac-Toe, but with a game set up in each space. Like so:

Each player takes a turn placing one X or O at a time. However, the player can only go in the space on the large game that corresponds with the space played by the player before.

Because the first player placed the X in the middle of one of the small games, the next player must go in the middle space of the large game.

If a player wins a small game, they get that space in the larger game.

If a player goes in a space where the larger game is already won, the following player can go in any of the larger game spaces.

The game ends when a player wins the large game, or if the game results in a draw.
